

IGS Help Centre

Product Version: Islington Grocery Services

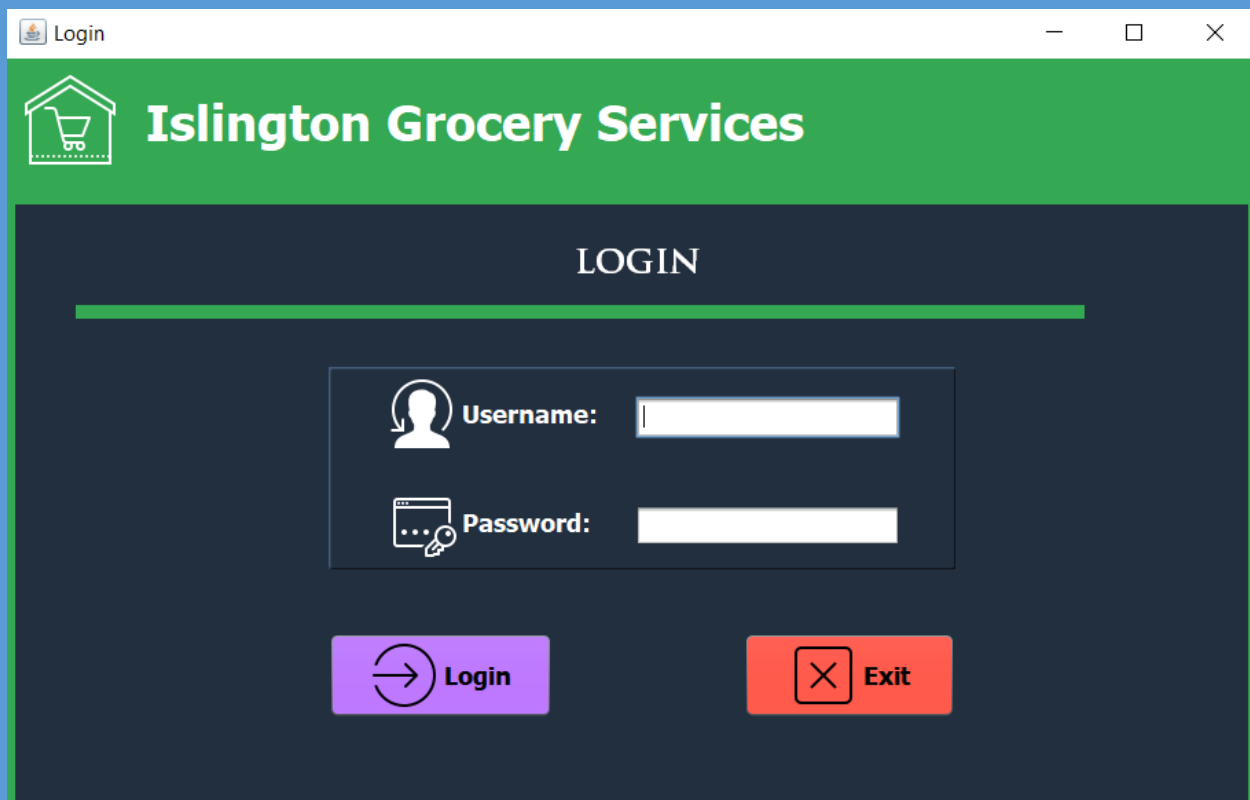

Tools Used to develop this Software: Java13.0.2; Java HotSpot(TM) 64-Bit Server VM 13.0.2+8

Runtime: Java(TM) SE Runtime Environment 13.0.2+8

System: Windows 10 version 10.0 running on amd64; Cp1252; en_US (nb)

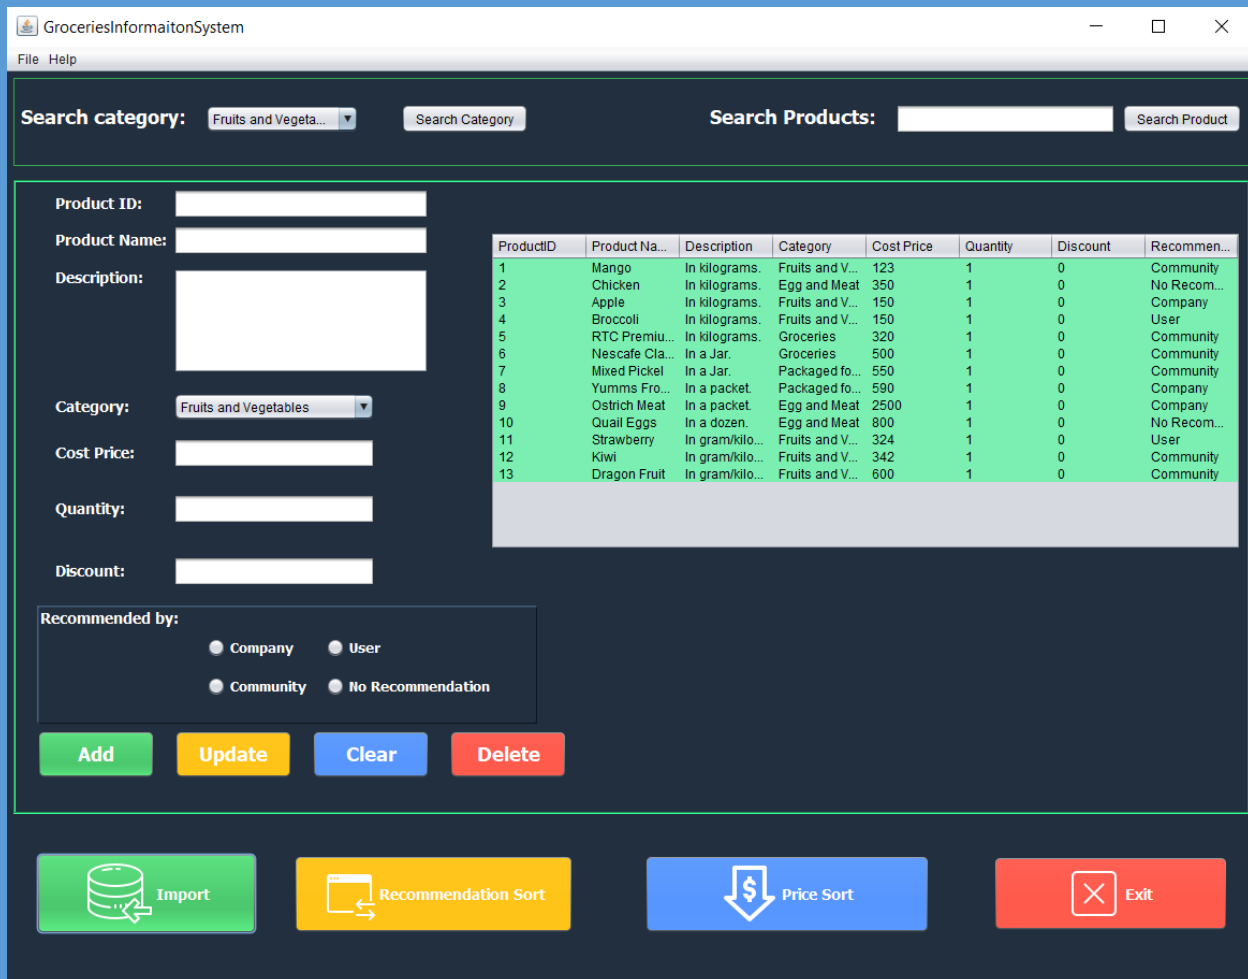

Welcome to the IGS help center. This is a java-based application that will help you to get all information about IGS.

First of all, you will see the design shown below. After running this application, you will enter the login page where the Username and password label are seen along with their text field. Then, the user should enter a valid username and password to enter inside this application.

The screenshot shows a Java application window titled "Login". The window has a green header bar with a shopping cart icon and the text "Islington Grocery Services". Below the header, the word "LOGIN" is centered in white text on a dark blue background. A horizontal green line separates the header from the login form. The login form consists of two input fields: "Username:" and "Password:". The "Username:" field has a user icon to its left, and the "Password:" field has a password icon to its left. Below the input fields, there are two buttons: a purple "Login" button with a right arrow icon and a red "Exit" button with a close icon.

After entering a valid username and password, this application will take you to the next page which is shown below. Otherwise, you will not be able to access this page.

Import **Recommendation Sort** **Price Sort** **Exit**

On this page, you can see many functions that are different from each other and they have their own specific uses. The importance of the above functions are shown below:

- Users can import excel data from excel file in this application.
- Users can sort products according to recommendations and price.
- Users can also search categories and products in this system which is shown on top of this figure.
- Users can add data in tables by pressing the ADD button, clear data from the text field by pressing CLEAR, update data in tables by selecting a particular row using

the UPDATE button, and delete data of table using the DELETE button as shown in the above figure.

- Users can double click the tables row and get that data on the text fields for easy update.
- Users can also use the menu bar where the open and exit options are provided to them. They can open the excel file from the open menu item.
- At last, the user can exit from this system by pressing the exit button.
